### **Brow Lamination**

Eye brow Lamination is a procedure that focuses on creating shiny, smooth brows. Also sometimes called an "eyebrow perm," the high-shine effects tend to be sought after by those who may be experiencing thinning or unruly brows. Unlike micro-blading or True Tattooing, needles and coloring are not involved. This also does NOT restore eyebrow growth.

As a semi-permanent procedure, eyebrow Lamination may also be a good fit if you want to keep your brows styled a certain way but are tired of using eyebrow gel every day.

***You will need to repeat the process every 6 months and a skin sensitivity risk is involved.***
